

Couple reports rural NY close encounter with two UFOs

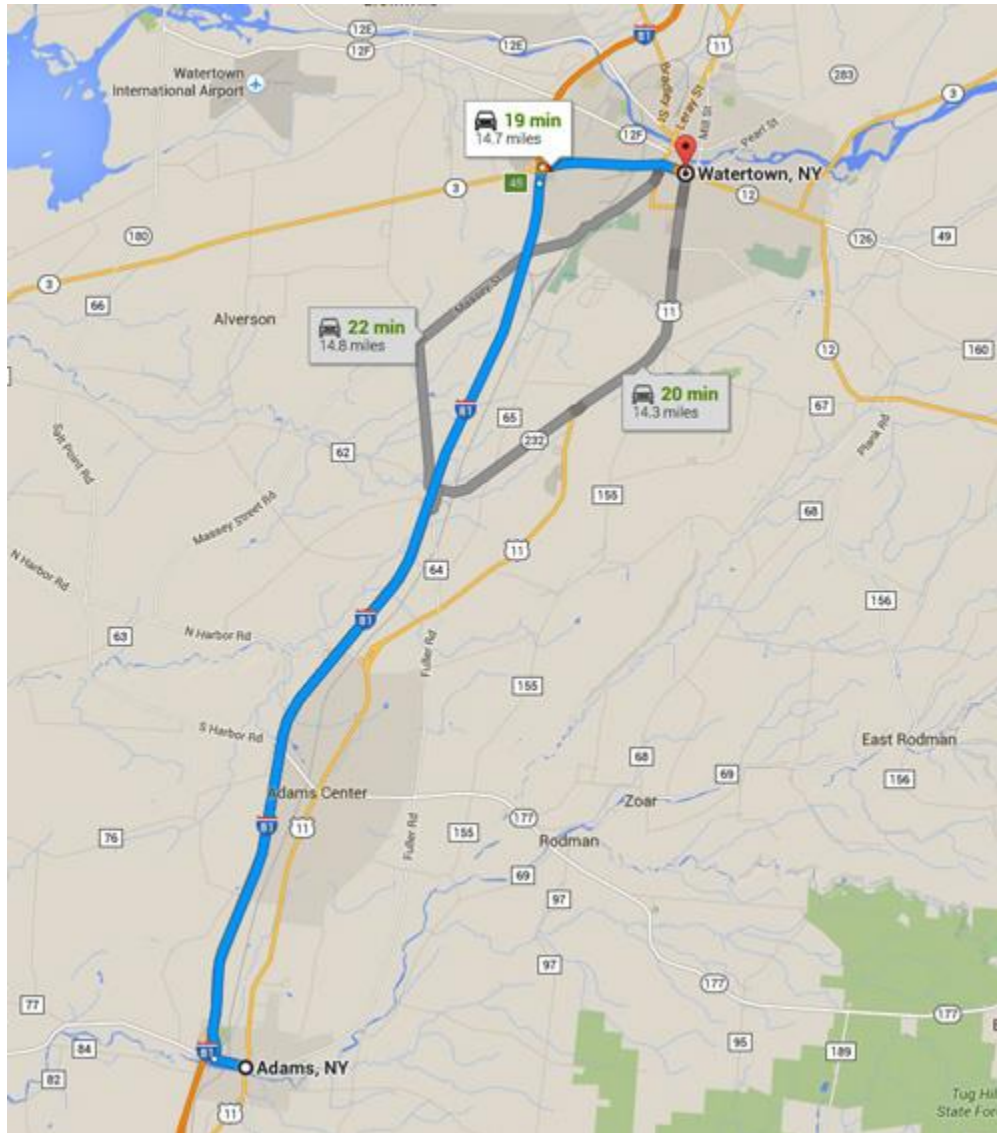

Posted by: Roger Marsh May 23, 2016

A New York witness at Adams reported watching two “limousine-sized” black triangle UFOs that silently floated at the tree top level, according to testimony in Case 76388 from the Mutual UFO Network (MUFON) witness reporting database.

The reporting witness was a passenger in a vehicle driven by her boyfriend southbound along Route 11 between Watertown and Adams at 11:45 p.m. on May 9, 2016.

“At about 11:45-ish we saw lights on the road up ahead and the picture just didn’t make sense to us,” the witness stated, “At first it looked to me like maybe a fire truck up ahead or something, but the closer we got the less sense the image we were seeing made.”

Adams, NY, is about 14 miles southwest of Watertown, along Route 11. (Credit: Google)

The two continued in the direction of the object, coming up on it fast, within seconds.

“They were in fact closer to us than I thought, maybe a quarter-mile from where we first noticed the lights. We had to slow down fast or we would have driven right underneath and past them. My boyfriend came to a stop so these things were drifting across the road right in front of us. We were driving south on Route 11 so they were drifting across the road in a southwest direction, and right over the road in front of us. They turned around and drifted back the direction they had been coming from; northeast.”

The two got a good look at the objects.

“Because they turned around in front of us, we got to see just about every angle of these things except the top, so it was not an optical illusion and we could tell how close they were to each other and to us. We saw them up close, clearly, and in 3-D. It was dark, but there were street lights and our headlights and they had blinking lights, red and white only, the whole time we saw them.”

The two watched closely.

“I had turned off the heat and radio as we came upon them, and I immediately stuck my head right out the window for the best angle, and two things struck me right away. First; the silence. They made no noise that I could detect above the noise of our vehicle, which is not loud. Second; their proximity to each other. They were so close together I would think they would be bumping into each other. When they turned around I thought we were going to witness a crash. They were only a few feet from each other. And they never split up when they were in our sights, but they moved independently, not like they were attached.”

The witness and her boyfriend were southbound along Route 11 heading into Adams from Watertown. (Credit: Google)

The objects were large.

“The craft were about the size of limousines, lazily floating over the road not far above the telephone poles. They were both triangular, but they were not the same. One was a wider triangle, like you might picture a military drone or something, but the other one was a skinny, pointy triangle. Both had, I believe, red blinking lights in the front corner on the bottom, and white blinking lights on the side corners on the bottom. Besides being triangular in shape and the lights, they were completely featureless, at least from the bottom and sides. Just perfect triangles, no other angles or patterns at all. Just black.”

The witness had never seen anything like this before.

“Like even any drones I look up that belong to any military or even anything out of Popular Science, nothing I’ve seen is a perfect triangle like that. They all have some other angles, discernable wings, engines, something. They were both like that, exactly the same except for the shape of the triangle. We were so close that if there was any other detail to notice in their shape, we would have seen it. We should have been able to see detail, but it was just their outlines, the lights, and flat matte black.”

It was a clear night.

“There were stars out and they blocked their light, blocked the lighter color of the horizon behind them. There was no light reflecting off them, and there should have been. There were all these lights like I said, and not one glimmer of a reflection off any part of them. And the lights that came off them were bright but not blinding; there was no glare, even so close. And my eyes have a problem with glare and bright lights. But not these.”

The objects stopped and turned around.

“After they turned around and we just gawked for what seemed like minutes, but must have been seconds, a spotlight shown coming from the side of I think the skinny one, right off the tip of the wing or side corner of the triangle. It shown in our direction, but I think it shown over us, not right on us... and then they were drifting over the trees back in the direction they seemed to have come from.”

The witness told her boyfriend to hurry up and chase them and not to lose them.

“I kept my eyes on them and could see the lights through the trees, and directed my boyfriend where to go, but I lost them through the trees. I could see them and then they were just nowhere. My boyfriend took a route that should have cut them off, if they had continued their speed and direction, and we drove around with my head out the moon roof searching and finding hilltops to search the horizons, but nothing. They were gone.”

The couple had to stop their vehicle along Route 11 to avoid driving underneath the two UFOs. (Credit: Google)

The two then drove around looking for a police car, but could not find one.

“We finally gave up and went home and I think it was close to 1a.m. I was determined to alert authorities. I knew they wouldn’t exactly believe us, or do anything about it, but I just wanted it on record, wanted someone to know that happened, and I’m just so curious, and I was hoping that we wouldn’t be the only ones! I figured they would get more calls, more reports. I thought with them being right above the ground and apparently in no hurry, someone else around must

have noticed something. It's a rural area, but right smack in between Adams and Adams Center."

The witness called Jefferson County Police, but the state troopers showed up first.

"The troopers said they would check around with Fort Drum and stuff and were nice, but obviously didn't take it very seriously, which is the best I really expected. I'm just hoping something else turns up. I want some more news. Even if it isn't extra-terrestrial drones or something, it still had to be some sort of secret technology or something that not many people have witnessed, and that's still amazing to me."

New York State Section Director John Lombardo and Chief Investigator Nicholas Voulgaris are investigating. Please remember that most UFO sightings can be explained as something natural or man-made. The above quotes were edited for clarity. Please report UFO activity to MUFON.com.

Conspiracy Theorists Claim UFO Prevents Huge Impact Of A Meteor To Earth

Posted on May 24, 2016 by LUFOS

Friendly aliens might have just saved the Earth from a destructive meteor strike, claimed conspiracy theorists.

The theory surfaced after a released footage showed a fireball exploding in the skies of Maine, New England in the U.S.

The natural phenomena show an apparent second, smaller object entering the atmosphere of the Earth during the incident on Tuesday.

The presence of a second object was confirmed by the American Meteor Society (AMS) but said that it was just a smaller meteor fragment as it broke up in Earth's atmosphere.

Despite the AMS explanation, most diehard alien chasers still thought an alien craft was dispatched to destroy the meteor, which believed to prevent an impact.

The theory further claimed that galactic patrols might be looking over humanity as these space beings know that people on Earth still don't have the technology to deal with comet strikes or asteroid, which could wipe out the entire planet.

The fireball was witnessed over Canada, Pennsylvania, Massachusetts, Connecticut, Rhode Island, New York, Vermont, New Jersey, and New Hampshire.

YouTube channel Nemesis Maturity uploaded the video that showed two objects – one seemingly followed the other.

The second, smaller object seemed to strike the bigger one prior to a big explosion. The video was from a security camera installed at Burlington International Airport in South Burlington, Vermont.

Mississippi witness reports cigar UFO under 500 feet

Posted by: Roger Marsh May 26, 2016

The witness was driving home from work on May 13, 2016, along Highway 72 when the UFO was first spotted. Pictured: Highway 72 in Corinth, Mississippi. (Credit: Google)

The witness was driving home from work westbound along Highway 72 at 11 a.m. on May 13, 2016, when the incident occurred.

“As I approached CR 735 to make a right turn I noticed a hyper white object in the sky,” the witness stated, “I pulled my car over and got out to observe it. The sky was almost perfectly clear with a few light sparse clouds. The object stood out.”

The cigar-shaped object was hovering. Pictured: Highway 72
in Corinth, Mississippi. (Credit: Google)

The witness described the object.

“I stood perfectly still and observed a cylindrical object with rounded corners (tic tac shape) spinning slowly. It widened as the sides faced me and dimmed as the edges faced me. I moved so that the object was sitting directly above a power pole. This let me see that it was perfectly still while spinning on its horizontal axis. It remained locked on its position for over three minutes and then slowly descended while moving north. It remained spinning without ever slowing or speeding up. It continued to descend until it dipped below the tree line and I lost sight of it.”

The witness took three images, but these were not included with the original report, which was filed on May 13, 2016.

The object began to drop until it could not be seen anymore. Pictured:

Highway 72 in Corinth, Mississippi. (Credit: Google)

“None show the object as it was hard to see the screen to aim the shot while the sun was shining on it. The object seemed to spin at about 50-60 rpm which is why the pictures may not have captured it as it was turning and not very visible as the edges faced me.”

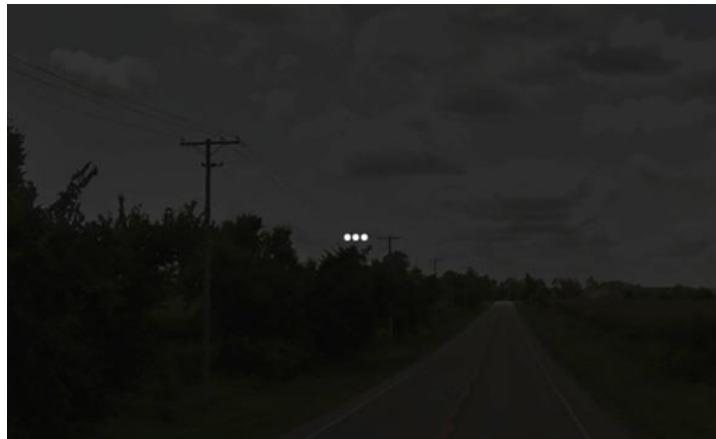

Mississippi MUFON Field Investigator Karen King is investigating. Corinth is a city in and the county seat of Alcorn County, Mississippi, population 14,573. Please remember that most UFO sightings can be explained as something natural or man-made. The above quotes were edited for clarity. Please report UFO activity to MUFON.com.

Triangle UFO moves low over Illinois

Posted by: Roger Marsh

An Illinois witness at Spring Grove reported watching a “large, illuminated” triangle UFO at close proximity about 9:30 p.m. on May 22, 2016, according to testimony in Case 76537 from the Mutual UFO Network (MUFON) witness reporting database.

Cropped and enlarged portion of witness illustration #1. (Credit: MUFON)

The witness first noticed the hovering object while driving southbound along Wilmot Road.

“Object was at an estimated height of 200 feet above ground,” the witness stated, “As I drove closer, I was able to get almost underneath it (~75-80 degrees from horizon).”

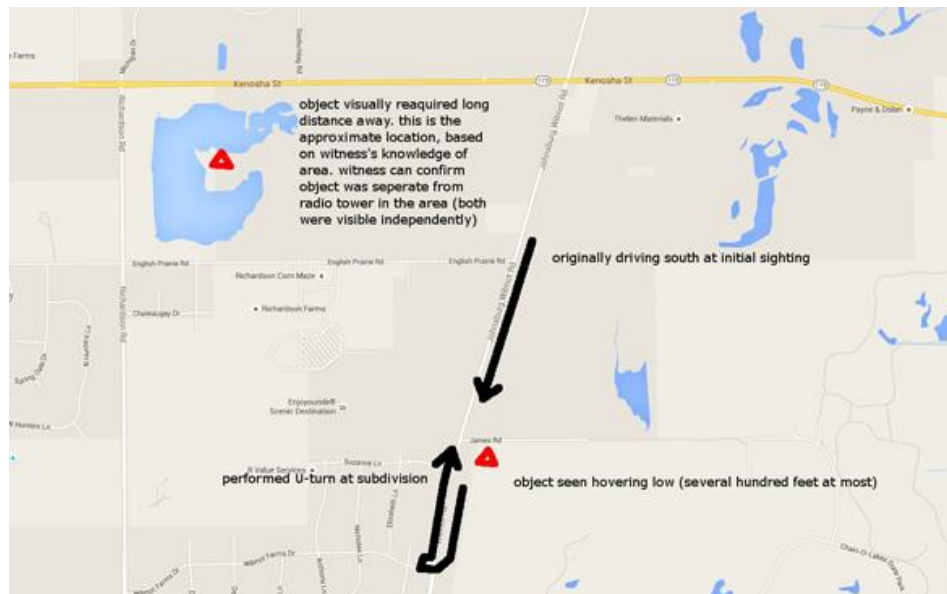

Cropped and enlarged portion of witness illustration #2. (Credit: MUFON)

The witness continued driving in order to find a location to turn around, losing visual observation behind trees.

Cropped and enlarged portion of witness illustration #3. (Credit: MUFON)

“Turning around at the nearest road and driving back to location took less than one minute. In that time, the object traveled northwest a good distance, and was seen moving slowly and slightly angled (banking?). Object became obscured behind trees on the side of the road and visual was lost. Entire encounter took less than two minutes.”

Witness map of the observation area. (Credit: MUFON)

The witness provided three illustrations of how the object looked – and a map showing the object’s movement.

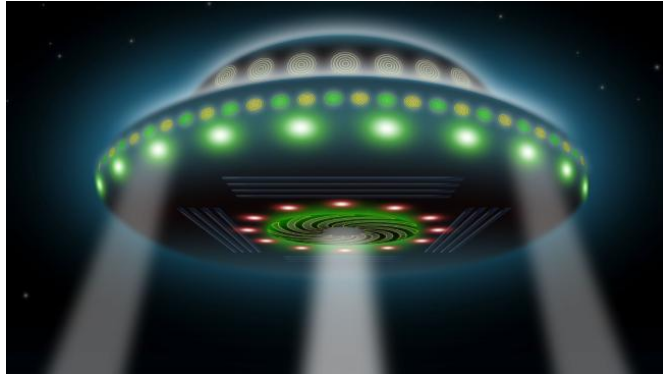

The witness was southbound along Wilmot Road in Spring Grove, IL, when the low flying triangle UFO was seen.
Pictured: A portion of Wilmot Road in Spring Grove, IL. (Credit: MUFON)

Illinois MUFON State Section Director Gregory Cisco is investigating. Spring Grove is a village in McHenry County, Illinois, population 5,778. Please remember that most UFO sightings can be explained as something natural or man-made. The above quotes were edited for clarity. Please report UFO activity to MUFON.com.

Terrified residents claim they saw an alien strolling around their neighbourhood

Staff writers news.com.au

Argentinian residents claim to have spotted a real-life alien coming out of a UFO.

TERRIFIED residents have claimed they saw an “alien being” emerging from a UFO, climbing through trees and walking around their neighbourhood.

Three students claimed they saw a strange mysterious object circling Argentine city Santa Cruz before landing at around 10pm, local news reported.

A TV news reporter for Notivision said: “Three students were witnesses to the sighting from El Dorado as they returned home.”

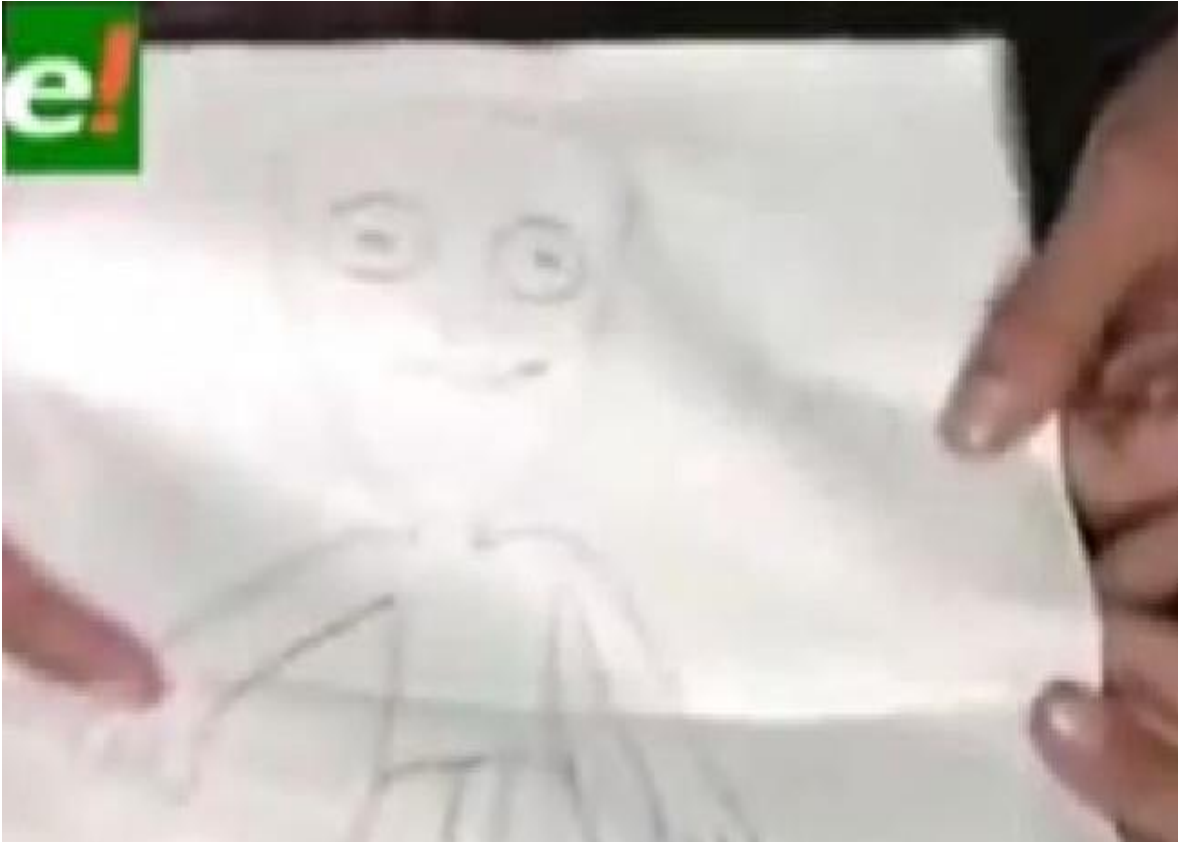

One witness said: “Something came down, straight down. A light came straight down, more or less, and they say it lost itself in that tree. It tried to get into that house over there.”

Another woman said: “A very loud sound was heard. All the signals went out. There was no way to record that sound. Suddenly it fell down and disappeared. I don’t know what it could have been.”

Whatever it was, it apparently didn’t stick around for long. They said it climbed through trees before abruptly heading back into its ‘spaceship’ and leaving.

Look, maybe some sort of life force came to our humble planet, slightly curious, quickly browsed our internet to see what humans are really like, and noped the hell out of there.

On the plus side, people have been attempting to draw the alien with hilarious results:

Bit too cute to be an alien. Source: Supplied

Argentina is no stranger to UFO sightings. Back in 1988, more than 7500 witnesses claimed to see a silver UFO flying over the city of Buenos Aires.

The country actually has its own annual Alien Festival, where thousands of earthlings meet in Capilla del Monte to see if they can spot UFOs flying around.

Alleged ET Related UFOs and ET Presence in the Peruvian Jungle

www.ExoNews.org

Small triangular markings allegedly left by landed UFO in San Gabriel de Varadero

Foto by Mr. Marcelino Aguilar

On Monday April 16 and 17, 2016, there were possible UFO landings and strange presences in the Amazon jungle of Perú. The events under investigation by Peruvian UFO researchers took place in “San Gabriel de Varadero” (about 1.5 – 3 hrs distant by boat from the city of Yurimaguas (using a canoe with propeller engines called “Peque Peque” because of the thup thup thup thup noise it makes) from the city of Yurimaguas in the Department of Loreto, Peru, in the Amazon Jungle. On Monday, April 16, 2016, between 8 and 9 PM (they go to bed early in the jungle), a woman called Agripina Guanze was sleeping with her sister and sons and was awakened by a strong sound like bird wing flapping and that of a kitchen blender then a strong light come into her bedroom as if a searchlight was pointing from the outside. She then saw 4 shining semi spherical objects flashing red and green lights like those of a traffic light and she allegedly felt that something was coming down. Apparently 2 of the objects landed in her garden about Eight (8) meters from her house. They are described as about one meter (3.3 feet) in size. Frightened, she hid in her house, called the local authorities by phone and alerted the community awakening other members of the village. The alarmed villagers then communicated with a radio station.

Teacher Freddy Nuñez (Mosombite?) communicated with a radio pleading for help and asking for police assistance with great emotion. At that moment he described the objects as “triangular.”

The report by UFO researcher Anthony Choy says the villagers saw 4 objects. Two would have landed and two remained flying and shining lights onto people. There’s a previous report saying that UFOs made strong noises as those of a kitchen blender. According to a previous interview an alarmed teacher (Herbert Canchari) trying to protect his family shot repeatedly to the objects with a shotgun and the objects quickly fled not giving time to shoot at them with precision (reason for which locals doubt they might be drones as has been suggested) but the objects returned a few hours later the following day (same night) in the wee hours of the AM and allegedly one or more persons saw humanoid beings coming out of a device not right in the village itself but apparently deeper into the jungle.

Apparently, at least one of the objects landed near a kindergarten school (a “jardin” or garden as it is called in Spanish) leaving a small triangular mark (perhaps more – this is unclear to me).

Researcher Anthony Choy thinks the objects might have been small because the mark had three indentations some 12 inches apart. He also supposes they may have been heavy because of making three deep small holes in hard soil.

In a previous interview a witness described appearance allegedly looked “like a kite” but was also described as a “machine” that after landing apparently lit itself up once again, made some strange movements (“as if recoiling to gather strength) as it lifted off ground before flying away.

According to a previous report, some individuals mention that humanoid(s) seen were dressed approximately as astronauts.

Ufologists from APU- “Asociación Peruana de Ufología” (Peruvian Ufological Association) have been visiting the area. Reportedly, the villagers are afraid and organizing themselves to patrol the area overnight. They are requesting the presence of the police or of military authorities. Marcelino Aguilar, a reporter from the large RPP Radio network and a local reporter from a newspaper called “El Diario de Yurimaguas” initially covered the news a few days ago.

Allegedly, the following day (this information retrieved thanks to an interview by Dr. Anthony Choy) Mrs. Donilda Lomas saw a tall & white man in relation to a light

that came down and she described him saying that he didn't step on the ground. Mrs. Donilda doesn't speak Spanish but rather a dialect from the Shawi ethnic group. She was translated. An object of pure light(s) came down and a tall white man also with lights came out. The object seen before also looked like an umbrella and made the sounds described before.

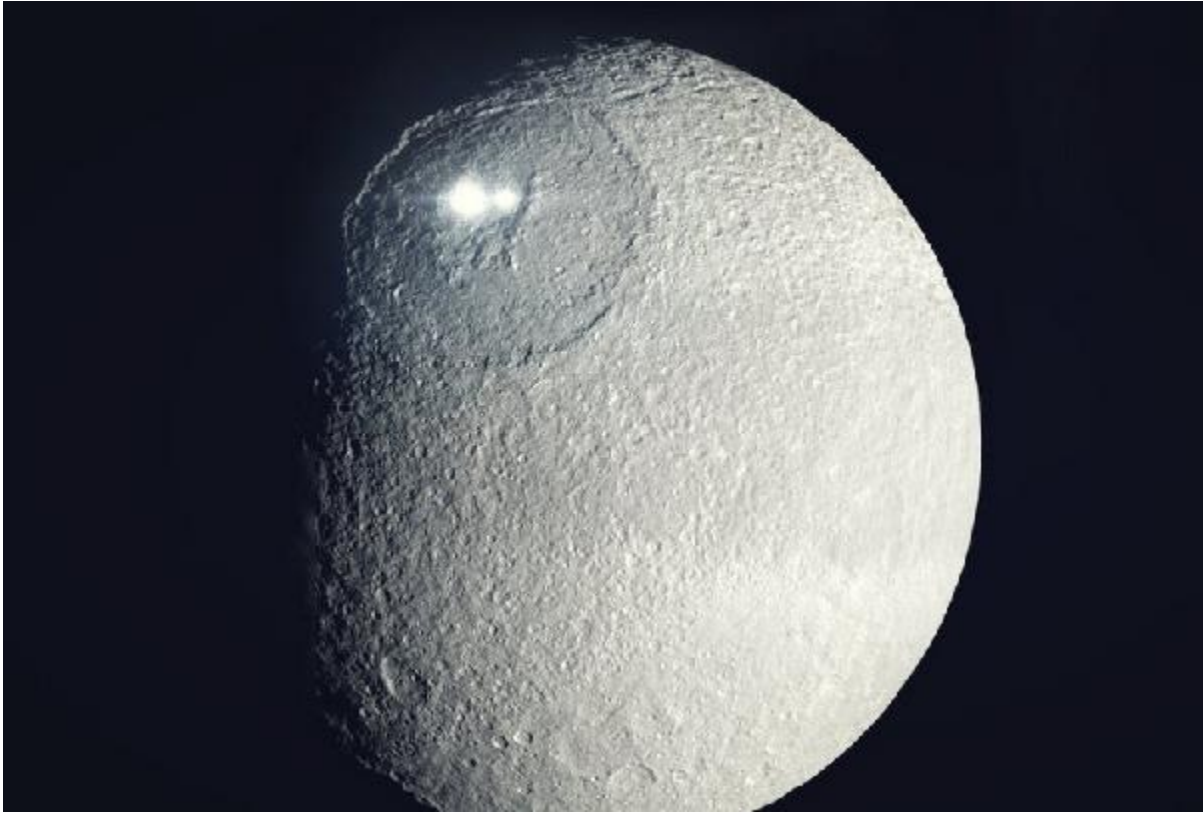

Some photos of daylight white orbs against the sky seem to have been taken since Wednesday 18 May.

The case raises several issues. Were these events staged using drones? If it was ET were there two classes of beings, the first more aggressive and simply aggressively appearing in this village with their devices (and even landing without notice) and the latter, allegedly seen by Mrs. Lomas, benign protectors? Was shooting at the devices appropriate since whatever came in unexpectedly apparently invaded a national air space and the peace and tranquility of a people highly sensitive to terrorist and other disruptive modern civilization incursions into their territories in the Amazon? Were these events what is known as a "psycho-social" earthly experiment for someone to assess how simple people in the process of becoming modern but living in a remote area of the jungle would react? Was this really some kind of ET activity or was it a "false alarm" as the false Carabayllo UFOs (party searchlights) and the Miraflores unusual Japanese kite in Lima Peru in 2015? Is it a gradual exopolitical exposition to other intelligent beings and their technologies? If after more investigation it remains ET-plausible or related, will this phenomena increase?

Preliminary Report (in Spanish) by UFO Researcher Anthony Choy Montes

Aliens Sending Out Signals from Ceres

by LUFOS

Baffled astronomers made the announcement that deepened the mystery of the bright spots on the dwarf planet Ceres. They recently claimed that the famous spots blinked at intervals of around nine hours.

With the latest discovery, some UFO hunters suggested that it is a definitive evidence of the theory that bright spots on Ceres are artificial beacons transmitting coded signals. The signals would guide ET spaceships coming in to land at a base on the dwarf planet, the largest body being discovered in the asteroid belt between Mars and Jupiter.

The unexpected fluctuations in the brightness of the mystery spots were observed in the spectrograph of High Accuracy Radial velocity Planet Searcher (HARPS) at ESO's La Silla Observatory in Chile. The widely known spots, called faculae, can be found in an 80-kilometer crater Occator.

Some UFO enthusiasts speculate that it is a signal. It could be a warning signal, a radar tower, or a greeting signal. It must be there for a purpose, according to UFO researchers. Does humanity need to signal back?

Some members of the UFO community think that alien colonists created the bright spots on the dwarf planet. Others speculate the extraterrestrials are still living on Ceres while some believe aliens may have already abandoned the planet long ago, but the lights are still working.

In December 2015, scientists already suggested that the bright spots could be a form of brine containing magnesium sulfate hexahydrate ($\text{MgSO}_4 \cdot 6\text{H}_2\text{O}$). Alien hunters, meanwhile, agree with scientists but insisted that aliens have used these materials to make a beacon.

Scientists have a better explanation for the variations in brightness. They suspect the fluctuations could be due to the activity below the surface that involves churning out plumes of material that reflect light when the planet faces the Sun. The brightness decreases when the plumes evaporate. The process could repeat in the next rotation when the planet faces the Sun again.

However, scientists admit they don't have enough data and observations to confirm the hypothesis.

If there are aliens on the dwarf planet, what do you think the identity of these aliens? Grey aliens? Tall Whites? Pleiadian Nordic aliens? Reptillians? Anakim? Or Altairians?

Ohio witness videotapes sphere UFO inside 'translucent square'

Posted by Roger Marsh

An Ohio witness at Rudolph reported watching and videotaping a UFO described as a "large ball within a translucent square," according to testimony in Case 47675 from the Mutual UFO Network (MUFON) witness reporting database.

Main Street in Rudolph, Ohio. (Credit: Wikimedia Commons)

The reporting witness and her husband were outside sitting in the backyard about 9:30 p.m. on May 26, 2013, when the incident began.

“He suddenly looked over my shoulder and said, ‘What the hell is that?’ The object was almost directly over us and was huge.”

Cropped and enlarged still image from the witness video. (Credit: MUFON)

The witness described the object.

“It was a large, translucent square and within the square was a very bright, pulsating, white light that changed to a faint, glowing red light and then back to white. We watched it slowly and silently float across the sky until it was out of our view due to the tree line. It moved slower than a plane. We both videotaped it with our smart phones.”

The case was reported to MUFON on May 27, 2013, and investigated by Ohio Field Investigator Donovan Lee and closed as an Unknown.

Cropped and enlarged still image from the witness video. (Credit: MUFON)

“The object was spherical in shape and appeared to be glowing and/or pulsating as if it was ‘burning,’” Lee reported in the MUFON case file. “Color described as white but glowing to a reddish hue. Made no noise.

“The temperature was typical at 38 degrees with winds due south at 15 mph and partly cloudy. Investigator is personally familiar with the area where object would have been flying over and attests that it is simply farmland in the middle of nowhere, sparsely populated, with no major airports within 40 miles and no military bases in the region. Object derivation is indeterminable from videos, however, the following irregularities are noted: · Object moves too slow for a balloon/kite and too fast for an airplane. · Object is not visually consistent with any known toy or hobbyist vehicle. · Object moves opposite of the slight breeze, so it is self-propelled, not ‘pushed along.’ · Not reported to MUFON, but on witnesses’ posts in YouTube, they also indicate a difference in size, saying, ‘Before we started taping, it was much bigger’ so it appears the object somewhat vacillated in size. Upon viewing the video, this is substantiated in the opposite – at 20 seconds into the video, object appears to glow, increasing approximately one-third in size.”

Cropped and enlarged still image from the witness video. (Credit: MUFON)

The Field Investigator also noted that two other Ohio cases were similar.

“The most unique aspect about this case is that there are two correlating cases of possibly the same type object. Case 47720 and a second report from Ottawa, Ohio. I shared the video from this case with the witness in both cases and both verbally indicated that the object was, in their opinion, the same.”

Rudolph is an unincorporated community in eastern Liberty Township, Wood County, Ohio, population 458. Please remember that most UFO sightings can be explained as something natural or man-made. The above quotes were edited for clarity. Please report UFO activity to MUFON.com.

UFO Recorded By Google Car Mapping Argentina, June 12, 2016, Photos,

UFO Sighting News.

Date of discovery: June 12, 2016

Location of discovery: El Cholar, Argentina

Google coordinates: 37°26'35.60"S 70°39'13.09"W

This was sent into me yesterday by a reader of UFO Sightings Daily. He said he found an object on Google Earth in Argentina that he wanted me to take a look at, because it had a disk shape.

When I checked out the coordinates he gave me, I found that the UFO was visible 4 times. The first three times it's seen far away, but still a disk shape...tilted. The fourth and final time it's extremely close and tilted again.

It's also tilted, which is what Bob Lazar (Area S4 scientist) says that disks need to do to move from place to place. It also has an antenna sticking out of it, this shows us the direction it's moving, the antenna seems to be bent the opposite way. Purpose may be for magnetic energy waves it harness to hover.

This is a very old and secluded area. I see brick buildings that were made in the 1800s nearby, with very few farms ever few miles. This is the perfect location of UFOs to do research on humans or other creatures and not be noticed.

Absolute proof of UFOs existing and aliens observing humans from a distance.

Scott C. Waring

Witness says triangle UFO 'over a mile long'

Posted by Roger Marsh

A Tennessee witness at Knoxville reported watching triangle UFO where each of its three sides was “over a mile long,” according to testimony in Case 76678 from the Mutual UFO Network (MUFON) witness reporting database.

The Knoxville witness said the triangle UFO was more than a mile long.

Pictured: Knoxville, TN. (Credit: Wikimedia Commons)

The witness was inside his home at 9:38 p.m. on May 29, 2016, when his father called him outside.

“My dad had gone out to get a briefcase out of the car, and he looked up and saw them,” the witness stated, “Then called me outside.”

The witness was not sure what he was looking at.

“Unidentifiable of course. It was a very large triangle. You could see three lights which was how we identified it. Each side looked to be over a mile long at the least. You could see a slight outline that was a bit lighter in color than the night sky.”

The object hovered in place for several minutes while the witness and his father watched. Knoxville, TN.

(Credit: Wikimedia Commons)

The witness described how the object was moving.

“It was moving in a straight line, and then took a slow turn to head northeast. It was flying too perfectly synchronized to be planes or helicopters. Also, there were no blinking lights.”

The witness got excited and went back inside in search of a camera.

“I ran to get the closest thing, which was my camcorder. I was not able to get a video though. If the picture is too dark it cannot take a video. I was amazed because I am a strong believer in aliens, so I never thought I would have an actual sighting. So I was excited and slightly scared at the time.”

The sighting lasted just a few minutes.

The object moved slowly away until it was out of view. Pictured: Downtown Knoxville, viewed from the south waterfront. (Credit: Wikimedia Commons)

“At first the object went behind a tree, but then moved out from behind the tree where we watched it for several minutes before it suddenly started a slow turn away from us.”

The incident is under investigation by Tennessee MUFON.

Knoxville is the county seat of Knox County, TN, population 183,270. Please remember that most UFO sightings can be explained as something natural or man-made. The above quotes were edited for clarity. Please report UFO activity to MUFON.com.

Mexico: A "Flying Saucer" over
Colima's Volcán de Fuego on
June 13, 2016, Photos, UFO
Sightings Daily

Location of sighting: Colima Volcano, Mexico

News source: <http://inexplicata.blogspot.tw>

This is a really cool sighting from Mexico. I actually saw something like this yesterday on the Colima cam, but didn't report it because it wasn't clear enough, but this one is fantastic.

Here you can make out dark disk with a thick center area and a round window or doorway on the edge. Wow, just mind-blowing.

Scott C. Waring

www.ufosightingsdaily.com

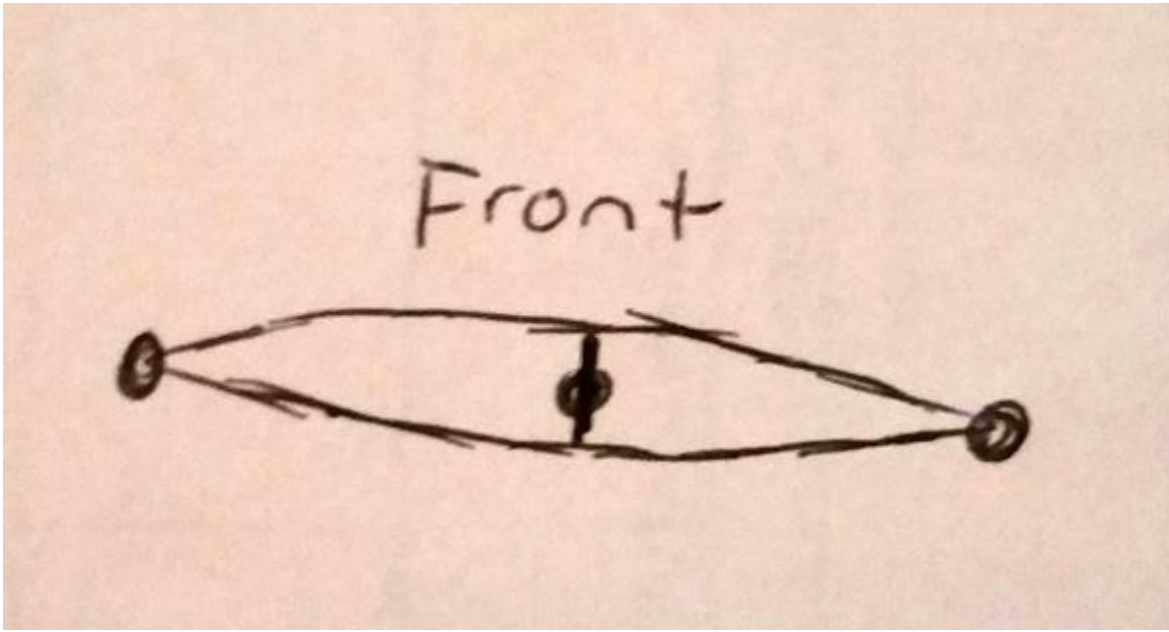

Inexplicata states:

Mexico: A "Flying Saucer" over Colima's Volcán de Fuego Mexico's Criterio Hidalgo (from Pachuca, state of Hidalgo) has reprinted a photograph of an alleged UFO captured by Webcams de Mexico (which has acquired a worldwide reputation for its captures of unusual phenomena over the Popocatepetl Volcano). The text reads as follows: "A new UFO photo has gone viral on social media, shown near the Volcán de Fuego in the state of Colima. Through its Facebook account, Webcams de Mexico displayed the photograph last Friday, showing an object crossing the sky near the fiery colossus. The photo asks the question "what could it be?" in order that users may leave their comments about what appears to be a flying saucers."

Michigan witness reports hovering triangle UFO

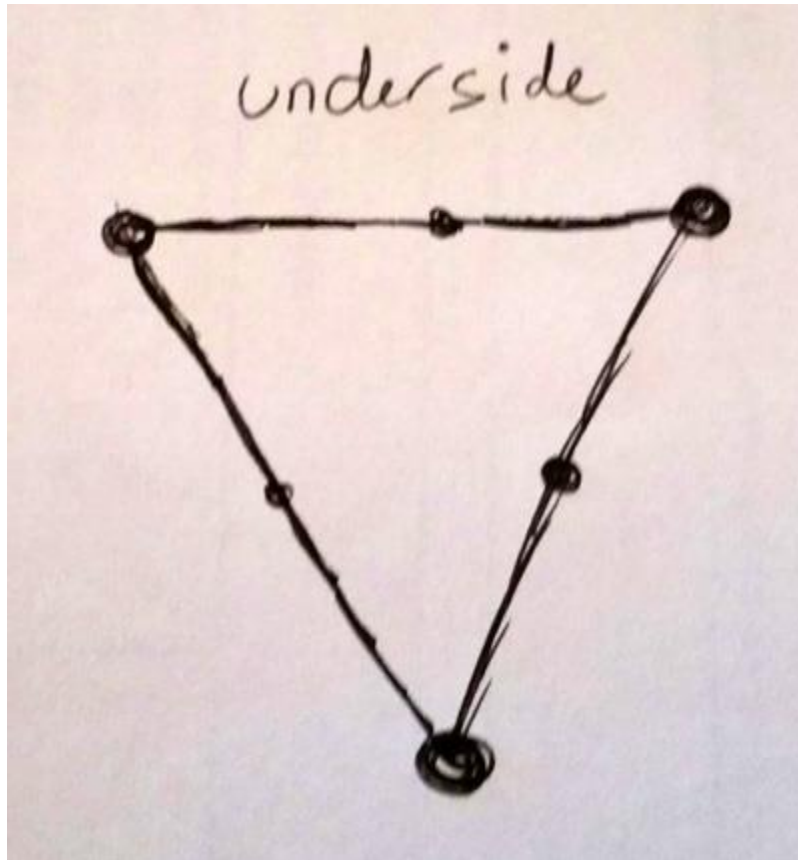

Posted by Roger Marsh

A Michigan witness at Ludington reported watching a low flying, triangle-shaped UFO, according to testimony in Case 76674 from the Mutual UFO Network (MUFON) witness reporting database.

Witness illustration. (Credit: MUFON)

The witness was out on a bike ride on his Harley Davidson beginning at about 9:30 p.m. ending up in the town of Ludington at 10:55 p.m. at a bridge over the Sable River where he parked for a cigarette.

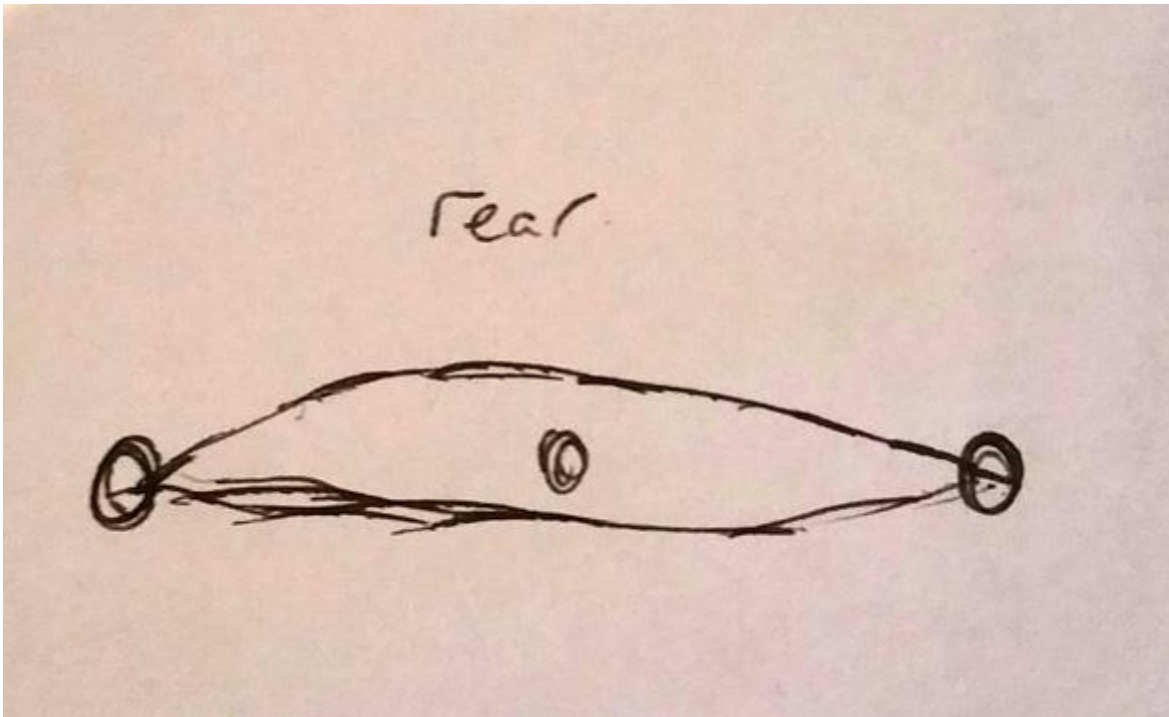

Witness illustration. (Credit: MUFON)

“I took a puff off my smoke and looked up to see it,” the witness stated, “It was large and broad, moving east down the lakeshore over the water. It was dull and dark and triangular in shape. The underside didn’t seem to be lit, but it had some reddish and bluish lights at its point and midway down the side. It seemed to be a half-mile out or so.”

The witness watched the object moving over the water and then it seemed to stop.

“The only other lights able to be seen in the direction of the object were the coastal lights that are Butterville and the Ludington light house beam. No other vehicles were around. I quickly shifted into gear and took off. I was twisting the throttle hard trying to bridge the distance between us fast. I was in top gear going about 80 to 90 mph as wind drifts the sand over the road and it can be hazardous. I wanted to go faster, but didn’t dare.”

The witness continued to watch the object.

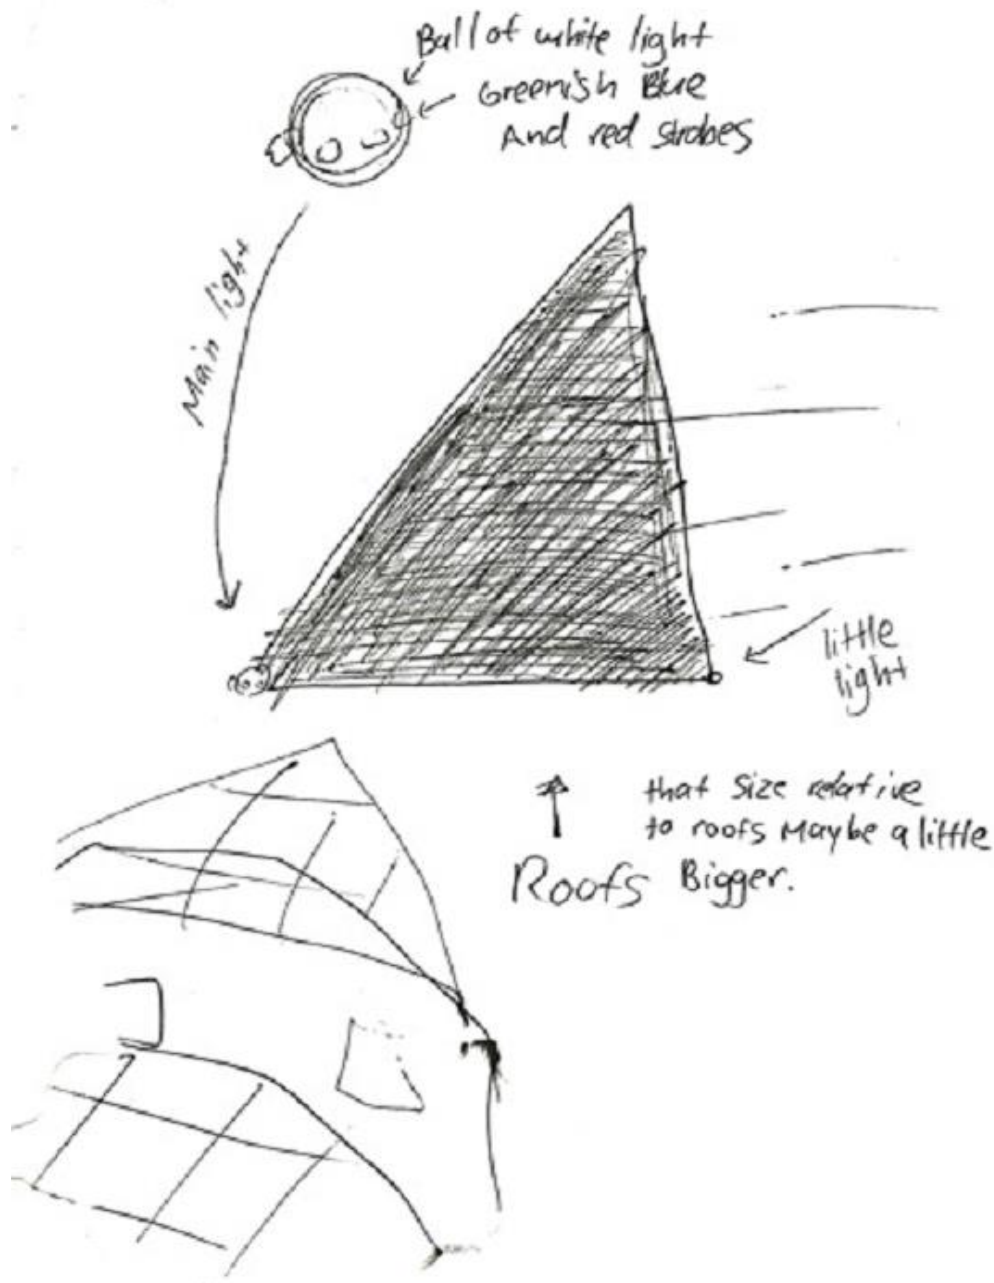

Witness illustration. (Credit: MUFON)

“It’s like it just hung there, waiting. It then shot north over the road and hung there. I panicked, slowing to a stop. It looked to be a half-mile to a mile up above the ground. It hovered there for at least three minutes and then shot straight up over to the south and then disappeared. I recall the lights seemed to rotate while it waited.”

The witness included three illustrations with the MUFON report, which was filed on May 29, 2016. Michigan Chief Investigator Daniel Snow is investigating. Please remember that most UFO sightings can be explained as something natural or man-made. The above quotes were edited for clarity. Please report UFO activity to MUFON.com.

Low Flying Triangle UFO Visits Indian Land In South Carolina

Posted on June 13, 2016 by LUFOS

A large, black triangle UFO was spotted at Indian Land by a South Carolinian witness. It reportedly moved away so quickly, which made the witness upset. He reported his strange experience to Mutual UFO Network (MUFON) and his testimony was filed in Case 76605 in the witness reporting database.

According to the report, he was lying in bed with a headphone listening to music when he noticed a light after looking out a bedroom on May 26, 2016.

The witness claimed to have seen a white light along with red and blue lights blinking on the UFO. He was thinking of a plane, but the object was moving so fast than any other typical planes that he had known. The speed caught his attention, so he got up and ran to the window.

Also unusual to him was the size of the light. It was so big and considering the distance, some detail could be made out if it was a plane, said the witness. The witness just saw the blue and red strobes on the wings, but it was just a ball of light to his view.

The witness observed the unidentified flying object as it moved behind trees, still traveling at very fast speed, and then emerged again from the trees.

He then apparently noticed a smaller white light following the first object at the same rate. Just before the witness lost sight of it, he realized that the two lights were connected and that he was actually looking at a huge, black triangle craft with lights at the points.

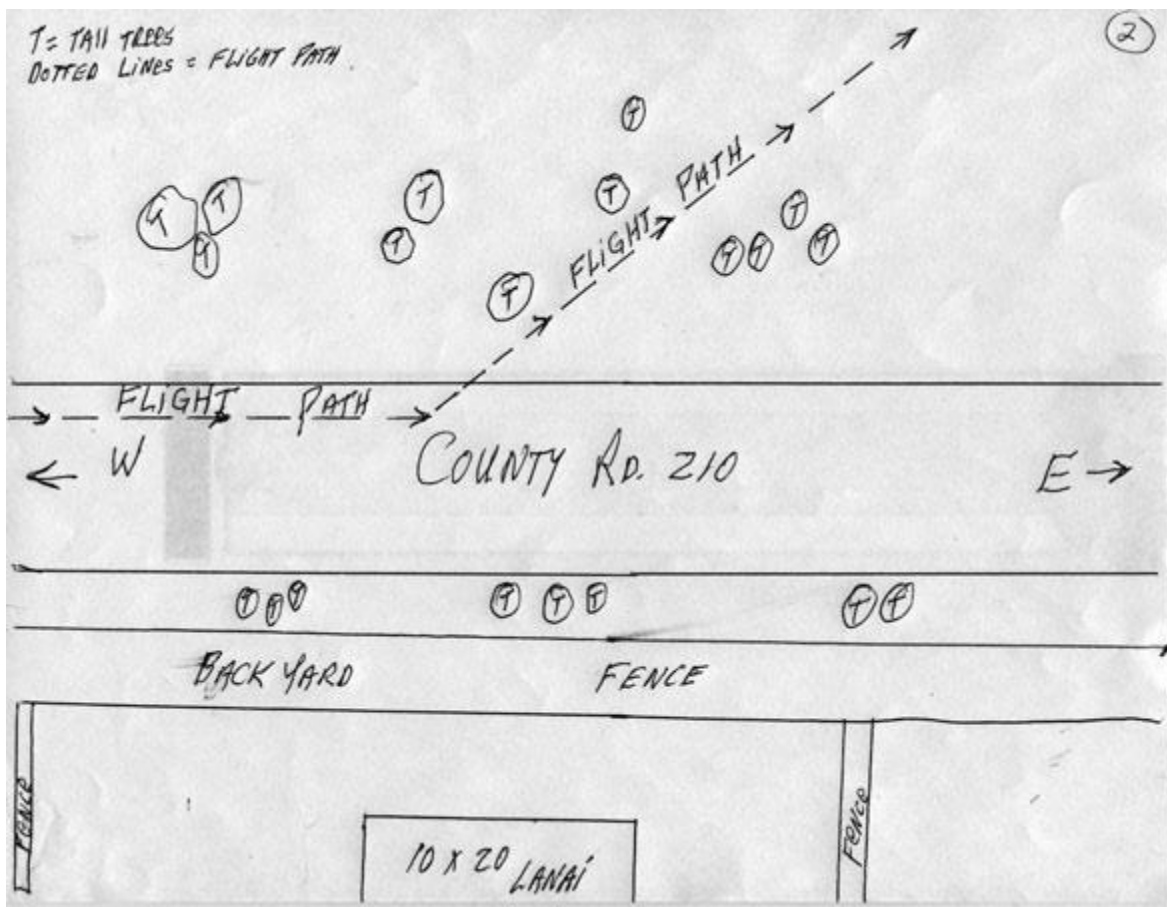

He was upset not to get outside to see it because he almost had a panic attack and it was too late for him when he got outside because it was gone.

The witness testimony was filed on May 26, 2016, along with one illustration.

Florida witness describes multiple 'vertical rectangle' UFOs

Posted by: Roger Marsh

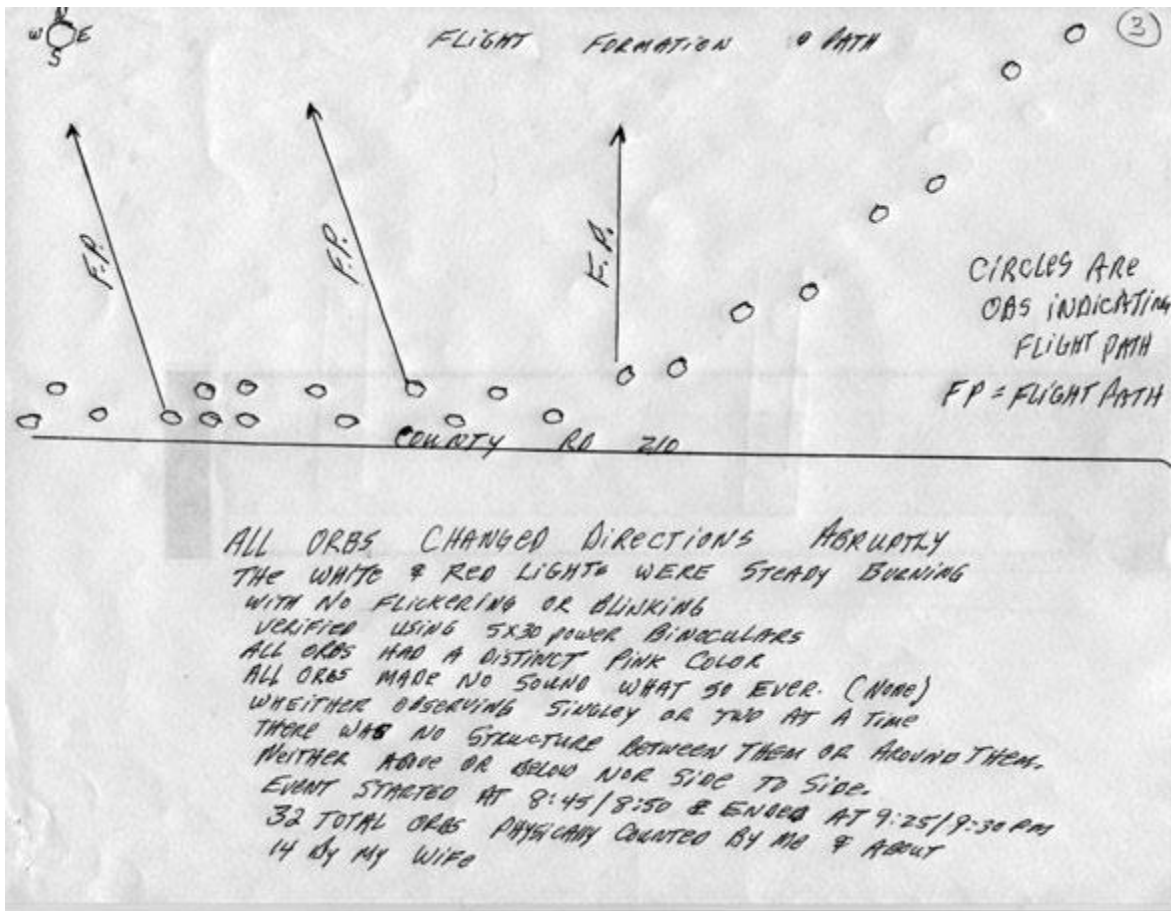

A Florida witness at St. Augustine reported watching as many as "32 lighted objects" as low as the tree tops in a vertical, rectangle design colored red and white, according to testimony from Case 76886 from the Mutual UFO Network (MUFON) witness reporting database.

Witness illustration #1. (Credit: MUFON)

The witness was looking out a back door when the objects were first noticed about 8:45 p.m. on May 20, 2016.

“They came out of the west and most headed northeast, but three split off and one went north, one went northwest and one went west,” the witness stated, “These objects appeared to fly in a military configuration.”

The witness was able to take some photos, “but the objects appear as just dots of light in the photos.”

The witness was unable to upload these images with the original report, which was filed on June 7, 2016.

“These objects were vertical, not horizontal. On most of them, the top three-quarter was red and the bottom one-quarter was white. When they got real low, they appeared to have a pinkish color to them. I was in the Army in Air Defense and these things are like nothing I have ever seen before. My wife also witnessed some of these objects in the sky.”

Florida State Section Director Dinah Lechner is investigating. Please remember that most UFO sightings can be explained as something natural or man-made. The above quotes were edited for clarity. Please report UFO activity to MUFON.com.

Roger Marsh is a UFO writer and content developer. He is Director of Communications for the Mutual UFO Network (MUFON) where he manages media contact, rights and permissions, and content development for television, film, documentary, radio, print and stage. Roger is a MUFON case researcher for History channel's "Hangar 1: The UFO Files." He is editor of the monthly international MUFON UFO Journal, executive producer of the weekly "MUFON UFO Traffic Report" radio show; serves as the MUFON webmaster; is editor of the bi-monthly international MUFON Newsletter, reporter for the daily "UFO Traffic Report" and publisher of the "MUFON Books" imprint. He is the author of Sacred Dialogue, editor of Silent Invasion, and co-editor of Ron Paul Speaks. Roger was featured in the 2015 season premiere episode of Destination America's "Monsters & Mysteries in America." His one-act radio-style drama series, "UFO Witness Theater" continues this year on MUFON radio as featured 45-minute episodes. His comedy and paranormal original books, novelettes, plays and films are available at rogermarsh.moonfruit.com. Roger and his wife, Joyce, live in Scottdale, Pennsylvania, restoring a 1910 Pennsylvania four-square.

Mass UFO Sighting Over Hong Kong On June 19, 2016, Photos, UFO Sighting News

Date of sighting: June 19, 2016

Location of sighting: Yin Lai Court, Hong Kong, China

News source: <http://www.ejinsight.com/20160620-netizens-capture-photos-ufo-sky-above-tsing-yi/>

In Hong Kong last weekend a UFO was seen that directly resembles a similar UFO that was recorded (many hours of footage) over Turkey a few years ago. Notice the cloudy mist around the UFO that semi hides its true form, but you can also see two of its propulsion engines on the right and left side. If seeing is believing...then thousands of people just became believers in China on Sunday night.

News states:

Pictures of an unidentified flying object (UFO) spotted above Yin Lai Court in Lai King emerged on the internet on Sunday, Metro Daily reported Monday.

Some netizens suggested it might simply be a drone or an aircraft caught in thick fog.

The object seen in the pictures look quite a bit like a flying saucer.

Other netizens reported they saw lights flashing in the sky above Maritime Square in Tsing Yi.

Headline Daily reported that the Facebook post containing the pictures attracted almost 2,000 likes and nearly 300 comments.

Szeto Wah-koon from the Hong Kong UFO Club said the object captured in the extended-exposure pictures wasn't a star, which would have left behind a star trail.

He said that if the pictures were taken from indoors, the reflection of lights from within the building could be superimposed onto the image, creating mysterious spots of light.
